

### Features include:

- Curious students will learn why bicycles have gears, why volcanoes erupt, and how cameras work.
- Readers will also discover fascinating facts about dinosaurs, cells, the human body, and more subjects.
- Each book is packed with colorful photographs, detailed illustrations, step-by-step project instructions, and text that is easy to understand.

### Make It Work Science

Students can learn real science by building a working rocket, constructing a box kite, and doing many other projects explained in this award-winning series.

For this exciting series, Make It Work! Science creator Andrew Haslam was a winner of the Best Science Writing for Children Award given by the American Institute of Physics.
