

Features:

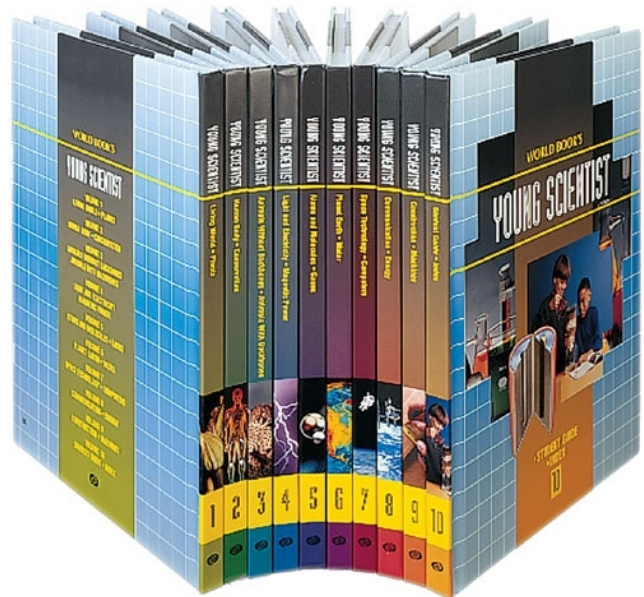

- Teachers and librarians appreciate this set because it allows them to present easy, successful experiments right in the classroom and lets students explore the hands-on way.
- Colourful photographs and illustrations that support the text, and focus on environmental and conservation issues, such as organic farming, pollution, greenhouse effect, and endangered species.
- Each volume also includes step-by-step, illustrated, hands-on activities that will engage students and provide a higher level of understanding.
- 3 BONUS CD-ROMs--each provides an additional six activities and one quiz to reinforce the concepts found in the set.
- Science is exciting and fun with World Book's Young Scientist.

Titles include:

- Living World/Plants
- Human Body/Conservation
- Animals Without Backbones/Animals With Backbones
- Light and Electricity/Magnetic Power
- Atoms and Molecules/Gases
- Plant Earth/Water
- Space Technology/Computers
- Energy/Communication
- Construction/Machines
- Student Guide/Index

World Book's Young Scientist

This 10-volume set presents an exciting picture of what scientists have learned about life and the universe, while inviting students to explore with hands-on
